

Case study 2:

DW's Agricon specializes in the sale and/or purchase and management of properties in Northern Australia on behalf of foreign and absentee investors. The majority of investors are from South-East Asia, China, Vietnam, Austria, Greece, the United Kingdom, the United States and South America.

We at first identify properties that are good value for the investor, within their capacity and aspirations. Financial plans and forecasts are provided to the investor and their financiers to help with the purchase and the Commonwealth's Foreign Investment Review process.

After a successful sale, the DW's Agricon team can provide specialist day-to-day management and administrative support, all within policy and statutory requirements.
